Reasonable time will be provided to enable safety representatives to carry out their functions subject to the exigencies of the service. This should be arranged with their line manager and the health and safety coordinator.

Where no union representation for safety is available under the Safety Representatives and Safety Committees Regulations 1977, the Health and Safety (Consultation with Employees) Regulations 1996 will apply and employees will be consulted directly as individuals, or through **elected** health and safety representatives (known as "representatives of employee safety" in the Regulations), or a combination of the two.

At Southbury, there is one elected member of the teaching staff and one elected member of the non-teaching staff whose role is to liaise with the school's Health & Safety Coordinator as issues arise. These names are clearly displayed on a noticeboard in the staffroom.

ARRANGEMENTS FOR IMPLEMENTING THE POLICY

Consultation with Staff

Local consultation

Line managers will consult directly with staff on health and safety issues relevant to a particular department or work area.

Health and Safety issues are raised regularly via the weekly staff business meeting, which is attended by all staff. Issues are logged in a book kept in the staff room and the site managers check this daily before taking remedial action. It is monitored regularly by the school's Health and Safety Coordinator. Meetings are called to address particular issues as required.

Health and Safety Procedures

The Schools Health and Safety Team has drawn up Health and Safety procedures and arrangements covering school-wide issues. These include the Health and Safety Framework Policy, Health and Safety Policies and Health and Safety guidance and procedures as found in the Health and Safety section on The Hub), Fire Log Book, Responsible Persons Premises Log etc.

Further procedures following required control measures for the school are drawn up locally following risk assessment.

Educational visits

The role of the educational visits coordinator, arrangements for seeking approval - both within the school and where appropriate from the LA, risk assessments, pre-visits, staff ratios, etc is covered in the 'Requirements for Educational Visits 2008 guide issued by the LA.

Fire and emergency procedures

The roles of all staff; how the evacuation will be conducted; arrangements for ensuring everyone has left the building etc are derived from risk assessment and follow from guidance in the Fire Log Book

Risk Assessments

The health and safety procedures referred to above were drawn up on the basis of an assessment of the risks. Some require further detailed assessment of the activity (e.g. display screen equipment, educational visits); in these cases the relevant member of staff must undertake the assessment. Others are generic risk assessments and where activities comply with the assessment there is no need to record a separate assessment. Where an activity differs from the generic assessment, the person responsible for the activity must ensure there is a re-assessment to

account for these variations. Where this is minor it may be no more than adding a simple local variation to the generic assessment.

The Headteacher or Deputy Headteacher and other line managers are responsible for ensuring risk assessments are drawn up and implemented for activities carried out under their area of control. For many such activities, line managers should arrange for a departmental health and safety procedure to be drawn up as a generic assessment, although, again, local variations may be needed when it is necessary to deviate from the generic assessment.

Formats for general risk assessment are available from the schools policy and guidance on risk assessment and includes specific guidance and advice e.g pupil risk assessment is available from the Schools Health and Safety section on The Hub.
